

DEWORMING PLAN EXAMPLES

Early Spring	Late Spring	Summer	Late Summer	Fall	Winter
Low Parasite Concerns					
<i>ivermectin/praziquantel</i>		<i>ivermectin, pyrantel pamoate, or fenbendazole</i>		<i>ivermectin/praziquantel</i>	
Medium Parasite Concerns					
<i>ivermectin/praziquantel</i>	<i>ivermectin, pyrantel pamoate, or fenbendazole</i>			<i>ivermectin/praziquantel</i>	<i>pyrantel pamoate, ivermectin or fenbendazole</i>
High Parasite Concerns					
<i>ivermectin/praziquantel</i>	<i>pyrantel pamoate or fenbendazole</i>	<i>ivermectin</i>	<i>pyrantel pamoate</i>	<i>ivermectin/praziquantel</i>	<i>pyrantel pamoate, ivermectin or fenbendazole</i>
Young Horses					
<i>ivermectin/praziquantel</i>	<i>pyrantel pamoate</i>	<i>pyrantel pamoate</i>	<i>pyrantel pamoate</i>	<i>ivermectin/praziquantel</i>	<i>pyrantel pamoate</i>
Seasonal Parasite Concerns					
Early Spring	Late Spring	Summer	Late Summer	Fall	Winter
Tapeworms				Tapeworms	
		Bots			
	Summer Sores, etc.				

Tapeworms: 3 available combination dewormers; there are no generics available for tapeworm control. *Products:* EQUIMAX® (*ivermectin/praziquantel*), Quest Plus® (*moxidectin/praziquantel*), Zimectrin Gold® (*ivermectin/praziquantel*)

Bots: *ivermectin* and *moxidectin* both kill bot larvae; *ivermectin* provides the broadest spectrum control. *Products:* All of the above brands & Bimectin® (*ivermectin*), Durvet Ivermectin (*ivermectin*), IverCare (*ivermectin*)

Summer Sores: *ivermectin* provides the broadest control available for parasites causing summer skin conditions. *Products:* Bimectin® (*ivermectin*), Durvet Ivermectin (*ivermectin*), EQUIMAX® (*ivermectin/praziquantel*), IverCare (*ivermectin*), Zimectrin Gold® (*ivermectin/praziquantel*)

General Parasite Concerns

Early Spring	Late Spring	Summer	Late Summer	Fall	Winter
Small & Large Strongyles					
Roundworms/Ascarids - an important concern with young horses					

Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.

Equine anthelmintics containing ivermectin or moxidectin have been formulated specifically for use in horses and ponies only. These products should not be used in other animal species as severe adverse reactions, including fatalities in dogs, may result. All trademarks belong to their respective owners.
